

Spotlight Primary Care Conference

Hosted by Prisma Health Department of Family Medicine

Friday–Saturday, October 4–5, 2024

**Clemson University Nursing building, Greenville Memorial campus
605 Grove Road, Greenville, SC 29605**

Join us for the Prisma Health Department of Family Medicine's Spotlight: Primary Care Conference. This activity will provide focused updates on the most important topics that are critical for frontline primary care providers. The conference is designed with brief content area reviews that are clustered followed by Q&A sessions meant to engage attendees and provide a robust educational experience.

This year's conference will include a pre-conference skills workshop covering basics of skin and soft tissue ultrasound and common outpatient skin biopsy procedures. Led by skilled clinicians in family medicine, internal medicine and dermatology, this activity will serve as an excellent introductory session for the novice or a great review for those with prior experience.

The conference will be a full day of high-level content reviews delivered by local experts in a variety of topics of interest for a busy primary care clinician. Attendees can expect to gain practical tips to enhance clinical performance and discuss new trends emerging in primary care delivery.

Registration

Fees:

Workshop: \$80

Conference:

Physicians.....\$100

APPS.....\$75

Other care team members, students.....\$25

Course description

Friday, Oct. 4

This hands-on workshop includes two sessions for point-of-care ultrasound and skin and soft tissue biopsies.

The first session will be led by Joy Shen-Wagner, MD, and will focus on skin and soft tissue point-of-care ultrasound. Increases in technology with decreases in cost of equipment have allowed more health care professionals to perform ultrasound diagnostics to aid in the sensitivity and specificity of palpation. This workshop will focus on skin and soft tissue, a procedure that is simple to interpret and carries low liability, benefiting patient and practitioner.

The second session will be led by MOH surgeon Charlie Darragh, MD. The skills workshop includes both punch and shave biopsies. There is a high demand for dermatological treatment from primary care as early detection is important. Implementing dermatologic practices into primary care improves revenue and patient relationships.

Saturday, Oct. 5

The sessions will update topics in primary care to close practice gaps and present emerging trends. Chronic disease management is always challenging due to changes in best practices, treatment guidelines and new treatment therapies. The presentation will combine lectures and question-and-answer sessions, with time between sessions for networking.

Committee members

John Emerson, MD, Co-chair
Jill McCreight, FNP-C, Co-chair
Joel Amidon, MD
Rebecca Smith, MD
Megan Hanna, MD
Mike Marshall, DO
Stephen Carek, MD

Program agenda

Friday, Oct. 4, 2024

1–5:30 p.m. Hands-on workshops: Sessions are geared toward applications in primary care.

Session 1: Intro to Skin and Soft Tissue Ultrasound and Carpal Tunnel Syndrome

Joy Shen-Wagner, MD; Joel Amidon, MD; Mike Wagner, MD; Stephen Carek, MD

(Break: 3–3:30 p.m.)

Session 2: Skin Biopsies

Charles Darragh, MD; Nico Limogiannis, MD; Jim Gettys, MD; John Emerson, MD; Jill McCreight, FNP

Saturday, Oct. 5, 2024
